WARNING
BEWARE OF UNDERGROUND SERVICES.
The locations of underground services are approximate only and their exact position should be proven on site. No guarantee is given that all existing services are shown.

GENERAL NOTES:
1. All dimensions are in millimeters unless noted otherwise.
2. Compact subbase to a depth of 100 mm at 95% relative density.
3. Use 50 mm concrete at a 55% - 80% and at 15% - 30% moist cure for a minimum of 48 hours. Driveways not to be used during this period.
4. Provide rime finish to all rump surfaces.
5. Concrete pavement thickness shall be in accordance with:
   a. Type 1 - Single Residential Access Area
   b. Type 2 - Industrial Commercial or Double Residential Access Area
   c. Type 3 - Tool Joint
6. Match new driveways to existing footpaths.
7. Any modification to the details shown will require formal approval from the Department.
8. Concrete Joint:
   a. Provide contraction joints at 1,000 maximum centres
   b. Provide expansion/contraction joints at 2,000 maximum centres and at all changes in structure.
   c. Provide jointed joints at 1,000 centres, with 100 mm deep, low joint, joints to be perpendicular to edge of concrete pavement slab.
9. Accesses to cater for large vehicles will require independent design and be submitted to the department for approval prior to construction.
