The Northern Territory Government is spending $4.5 million to upgrade the Dundee Beach boat ramp. Construction works start Monday 20 June 2016 and includes:

- a new 80 metre concrete boat ramp
- new larger rock groin to provide greater protection from ocean swells
- re-profiling of the beach to remove build-up of sand

At this stage of the works the boat ramp will operate as normal, with a temporary boat ramp to be installed at a later date.

Boat ramp users will notice an increase in heavy vehicle activity and should take care when using the boat ramp.
